Automated Review

Online Access to Committee

Fee Schedule Management

Dashboards and Reports

Re-Credentialing

Transform Provider Network Management to gain competitive advantage with I-Network

One Platform. One Solution. Faster On-Boarding.

TIME FOR CHANGE

In the rapidly changing health care environment Payors need to ensure their members have plenty of choices and have accurate and up to date information on their Providers.

When 60% of Provider network information is typically incorrect this poses three major challenges to Payors:

➢ Attracting and retaining quality Providers
➢ Provide intuitive tools for Providers to join networks faster
➢ Improve the quality of network data and Provider satisfaction

ENTER I-NETWORK

I-Network allows Payors to develop quality networks in record time.

Built as a truly web architected enterprise caliber solution, it eliminates manually intensive paper based processes that inhibit network growth and frustrate Providers, Payor staff and members.

I-Network generates automated feeds for claim systems and provider directories.

BUILD NETWORKS FASTER

I-Network orchestrates Credentialing, Re-credentialing, Product Assignment, Network Tiering and Fee Schedule management activities.

I-Network provides a single view of activities performed across departments and locations.

I-Network also provides insight into how and where your networks need to grow and pinpoints opportunities to improve your on-boarding process.

❂ Paperless Processing

❂ Centralized Document Management

❂ HIPAA security and privacy standards

❂ Auto Expiry Notifications

❂ Built-in Workflow and E-Notifications

❂ NPIs validation to NPPES, also handles Group NPIs, Sub NPIs and Individual NPIs

❂ Three levels of configurable audits to enforce data quality and completeness

❂ Seamless integration to third party verification services

❂ Automatic retrieval of NPDB Provider data

❂ Automated checklists to eliminate manual tracking of verification attempts

❂ Build tiered networks (e.g. Premium and Specialty networks)

❂ Assign products at practice or individual Provider levels

❂ Multiple Pay-To address management

❂ Address validations with USPS with latitude/longitude information

❂ Secure access to Providers, Practice Staff and Credentialing Committee
